SUMMARY

Software Engineer and B.Tech student with hands-on experience in full-stack development, QA automation, and AI-powered applications. Proficient in Java, JavaScript, Python, React, Next.js, Node.js, and MongoDB, with experience building REST APIs, automating end-to-end tests, and integrating LLM APIs. Strong foundation in data structures, algorithms, software engineering principles, and problem-solving.

EDUCATION

Madan Mohan Malaviya University of Technology — Gorakhpur, UP
Bachelor of Technology in Electrical Engineering – 7.75 CGPA — *Sept 2023 – May 2027*

EXPERIENCE

Aureeture AI — India
Software Developer Intern — *July 2026 – Present*

- Contributed to full-stack platform development and onboarding workflows supporting 2,000+ talent profiles across the Aureeture AI platform.
- Collaborated with cross-functional teams to design, build, test, and maintain software solutions while following clean-code, documentation, and engineering best practices.
- Participated in code reviews and Agile development workflows, contributing to software quality, maintainability, and team collaboration.

Nexerve India — Gurugram, India
Software Engineer Intern – Full Stack — *Nov 2025 – April 2026*

- Delivered 5+ projects using React, Next.js, Node.js, and MongoDB, applying MVC and modular design patterns to build maintainable and scalable codebases.
- Participated in cross-functional code reviews and leveraged AI coding assistants such as Claude and Cursor to support development and code quality.

PROJECTS

Mudrika International E-Commerce Platform | *Next.js, Node.js, MongoDB, Playwright, JavaScript, Razorpay* — Live – 2025

- Developed an e-commerce platform using Next.js, Node.js, MongoDB, JWT authentication, and Razorpay payment integration.
- Automated five key e-commerce workflows: authentication, browsing, cart, checkout, and payments using Playwright.
- Designed positive, negative, and boundary test cases; investigated failures using browser debugging tools.
- Validated REST APIs with Postman and debugged frontend, backend, database, authentication, and payment integration issues.

CraftSmith.in – AI-Powered Product Platform | *Next.js, Node.js, Express, MongoDB, Gemini API, LangChain, LangGraph* — Live – 2026

- Integrated the Google Gemini API to generate and autofill product details, targeting reduced repetitive manual data entry.
- Used LangChain and LangGraph to build LLM-powered workflows and orchestrate multi-step AI application logic.
- Designed reusable components and structured REST APIs for maintainability and scalability, and prepared the codebase for CI/CD using GitHub Actions.

FindFast – Real Estate Listing Platform | *Next.js, Tailwind CSS, Node.js, Express, MongoDB, Firebase Auth, Cloudinary* — Live – 2025

- Built a multi-user real estate platform supporting 500+ active property listings and implemented Firebase OTP authentication for secure seller onboarding and session management.
- Integrated Cloudinary CDN for optimized image delivery and improved listing-page performance through lazy loading and pagination.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), Python, C++, TypeScript
Frontend: React.js, Next.js, Vite, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST API Design, Firebase Authentication
AI & LLMs: LangChain, LangGraph, Generative AI, LLM Integration, RAG, AI Agents
Databases: MongoDB, PostgreSQL, Redis, Firebase, Prisma, SQlAlchemy
Cloud & DevOps: AWS, Git, GitHub Actions, Docker, CI/CD
Testing & QA: Playwright, Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Test Case Design, Bug Reporting, Cross-Browser Testing, UI Testing, End-to-End Testing
API Testing: Postman, REST APIs, HTTP/HTTPS, Request/Response Validation, Status Codes, JSON, Authentication Testing
Core Concepts: OOP, DBMS, Operating Systems, Computer Networks, SDLC, STLC, Defect Life Cycle, Agile/Scrum

ACHIEVEMENTS

- **AWS Certified Cloud Practitioner:** Validated foundational knowledge of AWS cloud concepts, services, security, and deployment practices.
- **AWS AI & ML Scholars Program (AWS + Udacity):** Built an AI productivity application, performed data analysis using PartyRock, and explored Generative AI, LLMs, ethical AI, and cloud-based ML workflows.
- **GDG Hackathon – Top Performer:** Recognized as a top performer in a 12-hour web development hackathon, delivering an application under strict timelines.
- **Smart India Hackathon (SIH):** Cleared Round 1 of the national-level hackathon organized by the Government of India.
- **DSA Practice:** Solved 200+ problems across LeetCode and GeeksforGeeks covering arrays, trees, linked lists, binary search, stacks, and queues.
